

12 July 2015

To Whom it may concern.

I manage various road maintenance contracts for the Waipa District Council and between 2010 and 2015 Green Streams Ltd. have carried out spraying and vegetation control activities within the road corridor in the district.

Green Streams Ltd. were sub-contracted for this work and though they performed all duties to the satisfaction of council and the primary contractor (Directionz Ltd. – roads sign and street furniture maintenance), the contract period ended in June 2015 after two extensions.

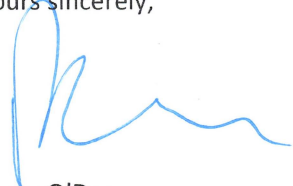

I had direct communication with Nigel Atkinson throughout the contract period and was always impressed by the timeliness and quality of communications, and likewise the quality of work that was completed. Nigel is straight forward and dependable and goes the extra mile to ensure client satisfaction.

As well as completing the physical vegetation control activities, Nigel carefully managed cost and work programming requirements which at times can be difficult or fluid in the public environment. In addition road safety requirements, and chemical use requirements were complied with at all times. Nigel works well in public areas including interacting appropriately with members of the public when required: there were no issues at all during the contract.

I do not hesitate in recommending Green Streams Ltd. for any vegetation control work including spraying, tree felling, grass mowing and any related work.

Don't hesitate to contact me on the number below should you require.

Yours sincerely,

Jason O'Dea

Contracts Engineer **WAIPA DISTRICT COUNCIL**
